## INTRODUCTION

Répondant à une dynamique régionale et internationale et se basant sur des standards mondialement établis avec une vue sur nos réalités, le Ministère de l'Enseignement Primaire, Secondaire et Professionnel a élevé les sous-branches lecture et écriture au rang de branche à part entière.

En vue d'améliorer la qualité des enseignements-apprentissages de cette discipline transversale dans les Centres de Rattrapage Scolaire, le Ministère des Affaires Sociales met à la disposition de l'apprenant et de l'éducateur un matériel didactique en conformité avec le programme national.

Au niveau 1, la langue congolaise est à la fois langue d'enseignement et branche enseignée. Le français n'est, à ce niveau, qu'une branche enseignée. Son apprentissage est limité à l'oral.

C'est précisément au niveau 2 que les acquis en langue congolaise sont transférés au français. Dès lors que les mécanismes de base du décodage sont installés dans une langue familière, les apprenants devraient aller plus sûrement et plus vite en français.

L'élaboration du manuel et du cahier de lecture de l'apprenant accompagnés du guide de l'éducateur (trice) se fonde sur les découvertes scientifiques les plus récentes, bien éprouvées et tout à fait fiables.

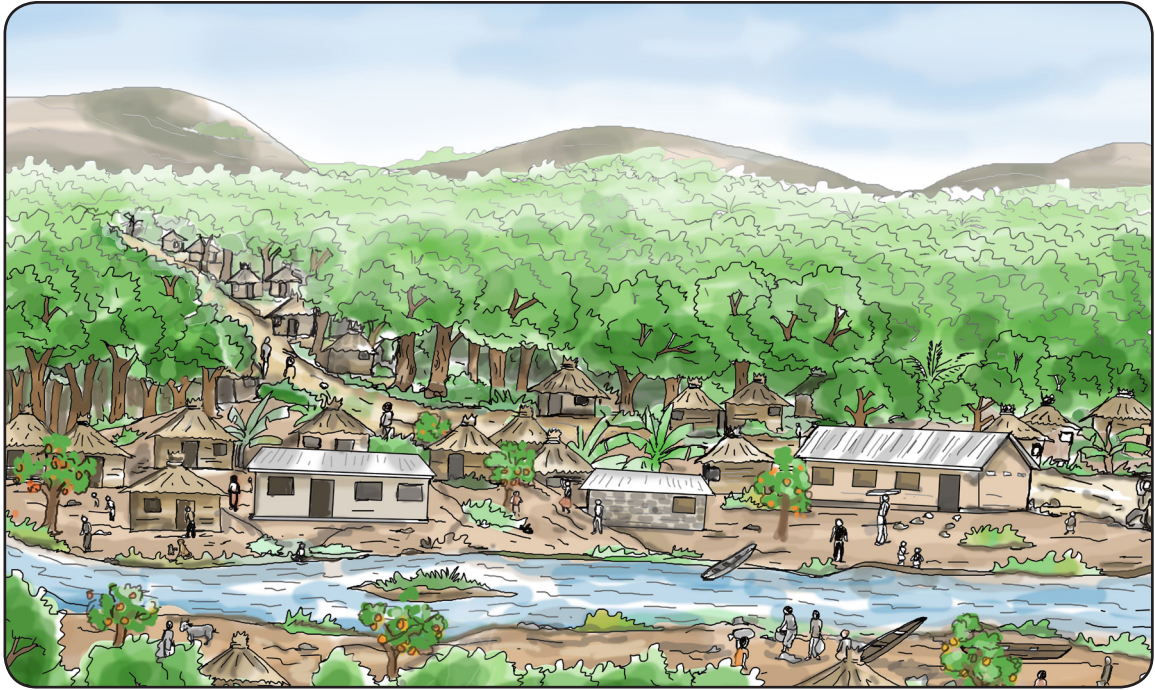

Dans la progression des enseignements-apprentissages, le noyau de base reste l'unité d'apprentissage. Elle correspond à une semaine d'enseignement-apprentissage qui exploite un sous-thème et se répartit en six séances en français et quatre en langue congolaise. La première est consacrée à la compréhension d'un message oral et la dernière à la consolidation des acquis de la semaine suivie d'une production écrite.

Ce cahier de lecture complète le manuel. C'est un merveilleux outil conçu pour approfondir les types d'exercices écrits et oraux faits en classe. Nous invitons les éducateurs / éducatrices ainsi que les parents d'apprenants à accompagner et encourager les apprenants à s'approprier le contenu de ce matériel didactique, riche en activités de lecture et d'écriture, et qui, sans aucun doute, leur permettra d'acquérir les compétences escomptées dans ce domaine.
